CONTENTS

Introduction

Feedbacks of lithosphere dynamics and environmental change of the Cenozoic West Antarctic Rift System
F.M. Van der Wateren and S.A.P.L. Cloetingh 1

Lithosphere Controls

Crustal and lithospheric structure of the West Antarctic Rift System from geophysical investigations — a review
J.C. Behrendt 25
Constraints on the Cretaceous thermal event in the Transantarctic Mountains from alteration processes in Ferrar flood basalts
M. Molzahn, G. Wörner, F. Henjes-Kunst and A. Rocholl 45
Lithospheric dynamics and mantle sources of alkaline magmatism of the Cenozoic West Antarctic Rift System
G. Wörner 61

Tectonic Structure and Constraints on Vertical Motion

Kinematic modelling of the West Antarctic Rift System, Ross Sea, Antarctica
M. Busetti, G. Spadini, F.M. Van der Wateren, S. Cloetingh and C. Zanolla 79
Cenozoic structural segmentation of the Transantarctic Mountains rift flank in southern Victoria Land
T.J. Wilson. 105
Cenozoic tectonic lineaments of the Terra Nova Bay region, Ross Embayment, Antarctica
F. Salvini and F. Storti 129
Contrasting Neogene denudation histories of different structural regions in the Transantarctic Mountains rift flank constrained by cosmogenic isotope measurements
F.M. Van der Wateren, T.J. Dunai, R.T. Van Balen, W. Klas, A.L.L.M. Verbers, S. Passchier and U. Herpers. 145
The Eastern Ross Sea continental shelf during the Cenozoic: implications for the West Antarctic ice sheet development
L. De Santis, S. Prato, G. Brancolini, M. Lovo and L. Torelli 173

Palaeoclimatic Signals

Pore-water signal of marine ice-sheets
R.C.A. Hindmarsh 197
The response of the East Antarctic ice-sheet to the evolving tectonic configuration of the Transantarctic Mountains
A. Kerr and P. Huybrechts. 213
Age of Sirius Group on Mount Feather, McMurdo Dry Valleys, Antarctica, based on glaciological inferences from the overridden mountain range of Scandinavia
A.P. Stroeven and J. Kleman 231
